

Reconstructed $X(2000) \rightarrow b_1 \pi$

August 24, 2010 DL
svn revision 6649

no background $\gamma p \rightarrow p X \rightarrow p b_1 \pi \rightarrow p \pi^+ \pi^+ \pi^- \pi^- \pi^0$

"good" = all final state particles (charged and neutral) are fiducial and only 2 photons reconstructed with m_γ within 200MeV of m_{π^0} .
