

## Assembling CDC

- Central Drift Chamber (CDC) – CMU
  - Straw tube design – single end readout
  - 28 layers (16 stereo layers –  $\pm 6^\circ$ ), 3522 tubes
- Forward Drift Chamber (FDC) – JLab
  - Traditional drift chamber, readout from both cathode strips and anode wires
  - 4 packages, 24 readout planes – 3 orientations, 12672 channels

## Forward Drift Chamber
